

**Is your email cluttered with annoying spam?**

Email is an invaluable tool in communicating with your business contacts. Advertisers and spammers have capitalized on your communications dependence by overloading your mail server and Inbox with endless barrages of junk mail. Constantly evolving spamming techniques make it difficult to control the ever growing onslaught of spam. The **ONE2ONE** MessageGuard Service is your answer to these annoying and often times dangerous messages. Your mail will be scanned for virus threats and spam using the latest detection technology and customizable rule sets.

**Do virus threats crash your email server and prevent business communications?**

**Is your Anti-Spam solution eating your business email?**

Contact **ONE2ONE** today for more information on protecting your most vulnerable form of business communication.
